Brighter, Bolder More Reliable

A new light on Colposcopy

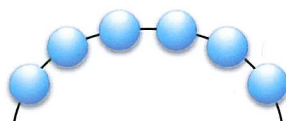

I love the new ZoomScope with Trulight which has a superior, brighter cool LED light source, a great advantage when performing colposcopy. There is never a bulb to change during a procedure. Together with superior optics and ease of focusing, Trulight offers a winning combination.

There is no other colposcope that even comes close!

*Ruth Steinberg, M.D.
New York City*

- Brighter, whiter light for true tissue color
- Cool LED light – no heat radiated to patient
- Green light at the touch of a switch
- No cooling fan, no noise
- Never change a lightbulb again especially during a procedure

ZOOMSCOPE™
with Trulight

Nothing works like a **WALACH**

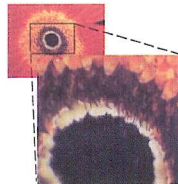

Colposcope/ Operating Microscope

- Nikon head with Nikon optics
- Zoom optical system for correct magnification and field of view at all times
- Full range magnification available from 4.5X to 20X
- Easiest scope to use, comfortable for patients
- Converts from colposcope to operating microscope in seconds
- Green light at the touch of a switch
- Slimmer, lighter, more maneuverable design
- Special suspension eliminates adjustment knobs or dials
- Super stable new base
- Attractively priced for any practice
- Digital imaging/video system options available

The Wallach suspension is solid, yet infinitely adjustable.

Wallach's design-engineered suspension components are crafted to exacting tolerances. This eliminates unwanted flex, yet assures fluid movement.

Continuous Variable Magnification 4.5X – 20X.

The Wallach ZoomScope provides wide field for initial screening of the entire area. High magnification for diagnosis and low power for aid in biopsy or treatment.

Now, hands-free power zoom and focus.

Change focus or magnification instantly while continuing with examination, biopsy or procedure.

Zoomscope™ is a trademark of Wallach Surgical Devices, Inc.
